PPE

Which PPE do we use?

Safety gloves

protects you against splinters
or cuts

Hearing protection

protects your ears and is mandatory
for noise higher than 85 dB(A)

Eye protection

protects your eyes from splinters
while grinding, sawing or chopping

Respiratory protection (P3)

protects you against inhaling
hazardous substances

Safety shoes (S3)

protects your feet against falling
and sharp objects and slipping

Head protection

protects your head from bumps or
falling objects

Protective clothing

protects you against cold, UV radiation,
hazardous substances and cuts

Face mask

protects you against splashing
materials

Fall protection

protects you in the event of a fall

Safety vest

ensures that you are clearly visible

Knee protection

protects your knees against injuries
and overload
